Pre-Anesthetic Blood Testing and Surgical Consent Form

Client	Pet's Name	Procedure	Date
--------	------------	-----------	------

Pre-Anesthetic Blood Testing:

Like you, our greatest concern is the wellbeing of your pet. Your pet is scheduled for anesthesia and/or surgery. Before putting your pet under anesthesia, we will perform a physical examination. However, we recommend a pre-anesthetic blood profile to be performed in order that we may maximize patient safety and alert the doctor to the presence of anemia, dehydration, diabetes, kidney disease, or liver disease which could complicate the procedure. These conditions may not be detected unless a pre-anesthetic profile is performed. In addition, the results of these tests may be useful later to develop faster, more accurate diagnoses and treatments in the event that your pet's health changes.

- Please **complete** the bloodwork you recommend prior to surgery on my pet for an **additional fee of \$60.00**
- I have elected to **refuse** the recommended blood work and request you proceed with anesthesia.

Laser Surgery:

Your pet's surgical procedure can be performed with a traditional scalpel blade or with a CO2 Surgical Laser. The benefits of using the laser are less pain, swelling, and bleeding. Sutures are usually still required. There is an **additional \$45.00 fee** for this type of surgery.

- I DO** **I DO NOT** authorize the use of the CO2 Laser.

Take Home Pain Medicine:

Your pet will receive 2 different medications for pain before the surgical procedure. Post-operative pain control is recommended. Prices for pain medication depend on the patient's weight and the procedures performed. Generally, the cost is anywhere **from \$14.00 to \$30.00**.

- I DO** **I DO NOT** want pain medication for my pet.

Therapeutic Laser:

This procedure uses a light that reduces healing time, helps with pain, and accelerates cell reproduction to help speed up your pet's recovery. There is an **additional fee of \$10.00**.

- I DO** **I DO NOT** authorize the use of the Therapeutic Laser.

Microchip:

Please consider having us place a microchip in your pet for permanent identification. More than 20 million pets are euthanized because shelters cannot identify them or their owner. The **HomeAgain microchip procedure is \$40.00** and covers microchip placement and Lifetime enrollment

- I DO** **I DO NOT** want to microchip my pet at this time.

Email address for microchip enrollment: _____

While I accept that all procedures will be performed to the best of the abilities of this hospital, I understand no guarantee or warranty has been made regarding the results that may be achieved. Should unexpected life-saving emergency care be required and the hospital staff is unable to reach me, the staff has my permission to provide such treatment and I agree to pay for such services.
